

ALWAYS ON STANDBY

GENERATOR & UPS INSTALLATION SERVICES

Central Power Services takes responsibility for all delivery, off-loading and positioning, mechanical and electrical installation, and all building works, to ensure minimum on-site delays. This complete range of in-house services allows Central Power services to provide a one stop shop for all clients who require a company capable of managing and executing a complete generator and UPS installation from initial design to handover and commissioning.

ALWAYS ON STANDBY GENERATOR & UPS INSTALLATION SERVICES

PROJECT MANAGEMENT

Upon placement of an order for any installation work, our project management teams will co-ordinate and organise the complete works. This encompasses all aspects of the installation from site visits, work programmes, method statements, risk assessments, CAD drawings, provision of manuals, through to practical completion and on site commissioning. This is followed by a hand-over to our service contracts department to ensure that the client is completely looked after with regard to their power protection needs.

DELIVERY AND OFF-LOADING

Our specialised fleet of vehicles ensures that your equipment will be delivered to you swiftly and professionally by our skilled team of operators. We can boast one of the UK's largest rear mounted vehicle cranes, which is ideally suited for this specialised equipment.

MECHANICAL INSTALLATION

Once the equipment is in position, our mechanical installation engineers will install fuel systems, exhaust systems and noise attenuation systems under the supervision of our in house project management team, to meet the customers' requirements and satisfaction.

ELECTRICAL INSTALLATION

Central Power Services has their own team of skilled electrical engineers who carry out electrical installations of any size. All work is carried out to the latest electrical standards.

COMMISSIONING

Upon completion of the installation, all aspects of the works are demonstrated and handed over to the customer together with a complete documentation package containing drawings, instructions and manuals.

Generating Confidence
