

# ALWAYS ON STANDBY SPECIAL PROJECTS

At Central Power Services, our special projects department ensures that any project with more specific and detailed requirements will receive individual attention throughout the entire process. Central Power Services can design, supply and install systems entirely to client specifications.

# ALWAYS ON STANDBY SPECIAL PROJECTS

## SOUND ATTENUATION

We are able to design and manufacture a range of sound attenuation to meet specific noise criteria for any generators. Sound reduction may be in the form of individual attenuators and exhaust silencers, or complete canopies with or without a floor, and also compliance with any customer specification. All sound attenuation is designed to suit the individual installation.

## MULTI-SET SYNCHRONISATION

Central Power Services can design, supply and install complete control systems for multi-set operation including load monitoring and auto start/stop to suit client demand.

## PARALLEL RUNNING (G59)

Central Power Services can provide, install and test all the necessary control equipment to ensure the safe and reliable synchronisation of a generator to the mains electrical supply.

## FUEL TRANSFER SYSTEMS

Installations where generators are running for extended periods can be supplied with fully automatic fuel management systems allowing the safe transfer of fuel from bulk tanks to day tanks. Bunding requirements can also be incorporated along with dump tank installations for any special projects.

## ADVANCED CONTROL SYSTEMS

Central Power Services can design and manufacture custom-built panels with as little or as much detail as you require. We can provide control panels, distribution boards and changeover panels all manufactured to client specifications and to the highest electrical standards. Our commissioning engineers are available for all types of control system commissioning worldwide.

## COMPUTER AIDED DESIGN

All projects are supplied with full documentation, drawings and instructions. Our project engineers use our CAD facilities for all design work.

## EQUIPMENT RELOCATION SERVICE

Relocation of customer equipment is a common requirement and Central Power Services can offer a full removal and reinstallation service and can upgrade your equipment as required.

## PART EXCHANGE

Central Power Services can offer a part exchange facility to all customers thereby ensuring that each customer wishing to upgrade their emergency generator is receiving the most cost-effective solution. Our pre-used equipment department offers for resale a large selection of part exchanged equipment following refurbishment and testing by Central Power Services.
